PROFILE

I am a highly driven and adaptive ICT student studying on the Technical-Vocational Track at STI College Bacoor. With a strong background in web development and programming, I've attended workshops on HTML, PHP, and database management. As an active member of the STI TechnoBytes Club, I am the technical personnel in charge of event assistance and technical setup. With my reputation for time management, a good attitude, and the ability to remain calm under pressure, I am constantly striving to improve myself both personally and professionally. My efforts have been recognized with accolades such as the STI Bacoor Codefest and being a resource speaker for HTML training courses.

WORKSHOPS AND TRAINING
